

METUKU RISHIT KUMAR

cb.sc.u4cse24428@cb.students.amrita.edu — metuku.rishit@gmail.com — +91 8297124277 — LinkedIn —
GitHub — Portfolio

Skills

Languages: Python, Java, C , MATLAB, MySQL

Tools: Git, Visual Studio Code, Eclipse, LaTeX

Concepts: Object-Oriented Programming (OOP), Web Development, DBMS, DSA

Projects

1. Geocoded Addressing System (On going)

(System Design, Algorithm Design, GPS)

- Designing a coordinate-based unique addressing system generating human-readable codes from GPS latitude and longitude values.
- Implementing grid-based subdivision logic to ensure one-to-one location mapping without duplication.
- About to propose a scalable digital solution to improve delivery accuracy and emergency response efficiency.
- **GitHub:** Project Repository

2. CARD Strike – Algorithm-Driven Strategy Game

(Python, Algorithms, Pygame)

- Engineered a turn-based card battle game integrating Greedy, Divide & Conquer, and BFS algorithms for AI decision-making.
- Designed JSON-structured card attributes with dynamic combat logic and graph-based movement evaluation.
- Implemented intelligent CPU opponent using recursive strategy optimization techniques.
- **GitHub:** Project Repository

3. Lost Sea Artifact Auction System

(Java, System Design)

- Developed a modular auction platform implementing bid validation, state management, and winner determination algorithms.
- Applied OOP principles to design scalable class hierarchies for users, artifacts, and auction sessions.
- Ensured fairness through structured bid tracking and controlled auction flow mechanisms.
- **GitHub:** Project Repository

4. FinalTix - A Database system for CA

(Java, System Design)

- Built a full-stack accounting management system with Node.js, and PostgreSQL, enabling efficient handling of transactions, reports, and client data.
- Designed and implemented RESTful APIs with JWT-based authentication, ensuring secure access control and scalable backend architecture.
- Developed an interactive and responsive UI, data visualization.
- **GitHub:** Project Repository

Education

Bachelor of Technology in Computer Science

Amrita Vishwa Vidyapeetham, Coimbatore

2024 – 2028

CGPA: 8.90 / 10

12th Class

Bhashyam Junior College

2024 – 2028

Percentage : 98.4

10th Class

Sri Venkateswara Bala Kuteer

2021-2022

Percentage : 94.4

Certifications

- Pursuing Full Stack Development Course by IBM in CourseEra
- Synaptix Frontier AI Hackathon — IIT Madras Shaastra 2026 (Participant)

Leadership & Achievements

- Member, IIC Student Council — coordinated student activities and supported departmental communication.
- Institution's Innovation Council (IIC) Volunteer — assisted in organizing and managing events during Anokha Technical Fest.

Languages

English, Telugu, Hindi
